

Adventure delivered.

Journey Models

Our Journey Models—also known technically as Park Model RVs—are sized at 300 to 400 square feet and built on a custom 15,000–21,000-pound trailer chassis with these standard features:

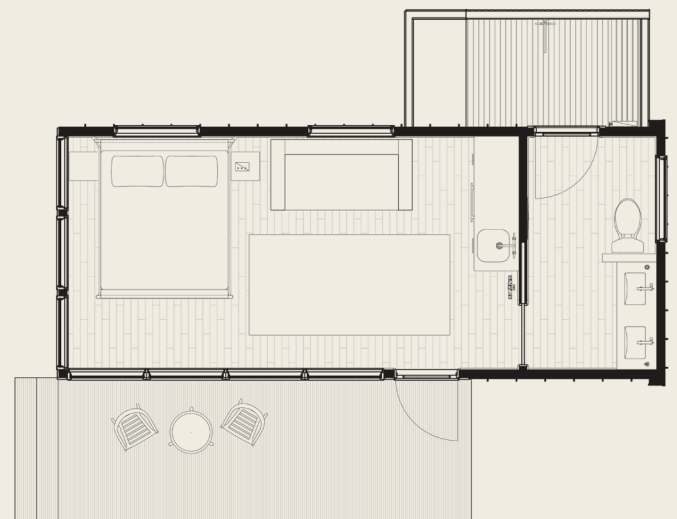

- Closed-cell polyurethane foam insulation
- 50-amp electrical service with breaker panel
- Dimmable LED lighting
- Natural wood paneling, sheet paneling, and/or wood acoustical panels for noise control
- Andersen “400” or “A” series windows/patio doors
- Metal standing seam or ribbed roofing
- Engineered hardwood or laminate flooring
- RVIA-certified and ANSI 119.5 compliant

Additional options: Solar power, off-grid plumbing, and sanitary solutions are also available. And for our partners in warmer climates where air conditioning is a must for comfort, our cabins come equipped with 9k BTU or 12k BTU Mr. Cool mini-splits.

About TimberHut

TimberHut Cabin Company designs, builds, and customizes turnkey-ready cabins for premier outdoor experience deliverers, from desert resorts to rural glampgrounds to winter sports destinations.

Made to last and made in the USA, our cabins are custom-built with our partners for their guests. Working together, we’ll assess the unique features of your location and the wants and needs of your visitors to design a site plan that will deliver immediate revenue for your business and memorable experiences for everyone. Ready to make it a reality? TimberHut also offers a flexible financing program to eligible partners.
